Notes on statistical tables

General

- 1 All headcount data are for the student population as at 1 December 2008. This is the census date for the Higher Education Student Early Statistics (HESES) survey submitted to the Higher Education Funding Council for England (HEFCE) in December of each year. The University also makes an annual return to the Higher Education Statistics Agency (HESA). This return provides more detailed information on individual students and covers the period 1 August 2008 to 31 July 2009. The full-time equivalent student load data are based on the HESA reporting period.
- 2 Students who are on intermission from a course (for example, owing to ill health) are excluded from all of the tables.
- 3 Fee eligibility categories reported in the tables are as follows:
 - Home – students with qualifying residence in the UK
 - EU – students with qualifying residence in the EEA (comprises the 27 countries of the EU plus Iceland, Norway and Liechtenstein) or Switzerland
 - Islands – students with qualifying residence in the Isle of Man or the Channel Islands (applicable to undergraduate students and students on postgraduate initial teacher training courses). All other postgraduate students with qualifying Islands residency are included in the Home category for the purpose of charging fees; this differs from the HEFCE/HESA definition under which they are recorded separately.
 - Overseas – students who do not have qualifying residence in the categories above. (Overseas students who are in receipt of an Overseas Research Students Award Scheme studentship award, who pay the Home rate of fees, are included in the Overseas fee eligibility category.)
- 4 The headings 'Undergraduate/Postgraduate', 'Arts/Science', 'Full-time/Part-time' in these tables are as defined by HESA. A complete list of courses designated 'undergraduate' or 'postgraduate' is shown in Appendix 1. The division of faculties and departments between arts and science is shown in Appendix 2.
- 5 Ethnicity and disability data are as reported on the basis of the student's self-assessment.

Time series and all students tables

- 6 This section summarises data for undergraduates and postgraduates, including time series data, and also gives a summary of the return made to HEFCE. Further information about definitions of student numbers (head count) and student load (full-time equivalent) are given in the individual undergraduate and postgraduate sections below.

- 7 Up to and including 1993–94, the definitions of UGC/UFC (the bodies that preceded HEFCE) have been used in cumulative tables; the figures were calculated at the UGC/UFC census date of 31 December. In and after 1994–95, HEFCE/HESA definitions have been used, and the baseline has been 1 December.
- 8 *Impact of European Union expansion on Home/Overseas student distribution*
- On 1 May 2004, the following countries were granted full EU membership: Cyprus, the Czech Republic, Estonia, Hungary, Latvia, Lithuania, Malta, Poland, Slovakia, and Slovenia. In and after 2005–06, students from those countries are classified as Home/EU, not Overseas. On 1 January 2006, Bulgaria and Romania were granted full EU membership. Students from those countries are classified as Home/EU in and after 2007–08.
- 9 The time-series tables show data for the last 20 years only. For older data, please refer to previous publications or contact the Student Statistics Office (for contact details see ‘Further information’, below).

Undergraduate tables

- 10 The undergraduate tables include students reading:
- undergraduate courses with the qualification aim of B.A., M.Sci., M.Eng., B.Th. or Mus.B.
 - Clinical Medicine (M.B.)
 - Clinical Veterinary Medicine (Vet.M.B.)
 - Certificate of Advanced Study in Mathematics (Part III Mathematics)
 - undergraduate courses, but who will not be awarded a qualification (these are either incoming exchange or other visiting students, or students who have been awarded a Cambridge degree from a previous course of study).
- 11 The undergraduate tables do not include part-time students on undergraduate-level courses at the Institute of Continuing Education (ICE). However, an estimate of FTE load for these students is included in the FTE load tables.
- 12 *Undergraduate numbers (head count)*
- The head count includes both incoming and outgoing exchange students (ERASMUS and MIT), and students studying or working abroad as part of their course. However, incoming MIT and ERASMUS exchange students and outgoing ERASMUS exchange students are excluded from tables UG03a and UG04a, because they do not pay fees.
- Pre-clinical medical students and pre-clinical veterinary medical students read the Medical and Veterinary Sciences Tripos in years one and two, but read a different tripos in year three. In all tables they are included under the respective headings ‘Pre-clinical Medicine’ or ‘Pre-clinical Veterinary Medicine’, irrespective of the tripos examination for which they were entered in their final year (with the exception of Table UG07ii, which gives a breakdown of numbers by the actual tripos read).

13 *Undergraduate student load (measured as FTE – full-time equivalence)*

The detailed calculation of undergraduate FTE is complex and modified from time to time. Changes in student load may be the result of changes to the formula, not a change in the student cohort itself. Any queries should be directed to the Student Statistics Office (for contact details see 'Further information', below).

The calculation of student load differs from the method used for the head count of students in the following respects:

- Third-year pre-clinical medical and pre-clinical veterinary medical students are counted as load on the faculty/department appropriate to the tripos examination for which they were entered.
- Modern Languages and Oriental Studies students spending a compulsory year abroad are counted as a load of 0.5 on the appropriate faculty or department, but are included in the numbers as full-time students. Students studying in Paris on the Double Maîtrise programme are given an FTE load of zero.

Candidates for triposes that are taught entirely within a single department were counted as an FTE load of 1.0 on the faculty/department concerned. Other candidates were counted as a fractional FTE load on departments appropriate to the papers they were offering. Thus a candidate for Part IA of the Natural Sciences Tripos offering Chemistry, Physics, Materials and Mineral Sciences, and Mathematics was counted as an FTE load of 0.27 on Chemistry, 0.27 on Physics, 0.135 on Earth Sciences, 0.135 on Materials Science and Metallurgy, 0.16 on DAMTP, and 0.03 on the Computer Laboratory.

14 *Fee band (Tables UG03a and UG04b)*

From 2007–08, these tables provide a breakdown of students (a) paying the University composition fee at the rate appropriate for students who started courses before October 2006 or who deferred entry to October 2007, ('Old fees') and (b) those paying the higher rate of fee for new entrants in and after October 2006 ('New fees'). Appendix 4 shows the 'old' and 'new' University composition fee rates.

Affiliated student tables

- 15 These tables give a further breakdown of some of the data presented in the undergraduate tables. 'Affiliated student' is defined as any person who, before matriculation in the University of Cambridge, has received or become qualified to receive a degree from another institution of higher education, subject to approval. Students who already hold a Cambridge degree are thus excluded from this definition and are recorded as 'Graduate students reading triposes'. These definitions are not used by HEFCE/HESA.

The tables include data for both affiliated students and the small number of Cambridge graduates reading triposes. Up to and including 2004–05, the tables excluded Cambridge graduates reading triposes.

Postgraduate tables

- 16 The postgraduate tables include data for all postgraduate students, with the following exceptions: postgraduate ERASMUS and other visiting postgraduate students, and part-time students on postgraduate-level courses at the Institute of Continuing Education (the latter students are included in the total FTE load estimate for ICE students). Within the University of Cambridge, a further distinction is made that is dependent on the student's course of study, whereby some students are registered as graduate students. Tables that present data by course of study reflect this division under the respective headings, 'Registered graduate students' and 'Postgraduates who are not registered graduate students'.
- 17 Most students studying for the Ph.D. and Eng.D. are required to complete a probationary year, and are initially registered either for the Certificate of Postgraduate Study (C.P.G.S.) or for a probationary Ph.D. (For further information about routes to the Ph.D. see www.admin.cam.ac.uk/univ/qsprospectus/study/research/phd.html.)
- 18 *Mode of study*
- Students are classified as 'full-time' if they are undertaking a full-time course and have not completed the minimum requirements of their course (i.e., they are neither writing up nor under examination) and are not intermitting.
- Students are classified as 'part-time' if they are undertaking a part-time course and have not completed the minimum requirements of their course and are not intermitting.
- Students who have completed the minimum requirements of their course and are not intermitting are classified as either 'full-time writing up/under exam' or 'part-time writing up/under exam'.
- Up to and including 2005–06, students undertaking a part-time course and students writing up/under exam (either full-time or part-time) were both classified as 'not full-time'.
- The definitions of 'full-time', 'part-time', 'not full-time' and 'writing up/under exam' have changed over the period 2004–05 to 2007–08. Please see below under 'postgraduate student load' for further details.
- 19 *Postgraduate numbers (head count)*
- The postgraduate numbers are presented by mode of study: full-time, full-time writing up/under exam, part-time, and part-time writing up/under exam.
- 20 In and after 2007–08, additional tables (PG02a, PG05i, and PG06b) have been included to show the numbers of postgraduate students admitted to their courses in the Lent and Easter terms preceding the census date. This is to supplement tables PG02, PG05, and PG06a, which show students admitted in October (the Michaelmas term). Thus it is possible to derive the total new intake of students since the preceding 1 December census date.

21 *Postgraduate student load*

Students are counted according to the department in which they were recorded as working on their postgraduate course/research on 1 December. These departments are assigned to a cost centre (see Appendix 2) and FTE load follows this attribution.

Time series data should be interpreted taking account of recent changes in the definition of 'full-time', 'not full-time', and 'writing up/under exam' and in the allocation of FTE (full-time equivalent) load for postgraduate students for different periods of their career, as follows:

- Up to and including 2004–05, postgraduate students undertaking a full-time course were recorded as 'full-time' for the required terms of their course, and after those terms were completed, as 'not full-time'. For example, a three-year Ph.D. was recorded as 'full-time' in the first nine terms (and allocated an FTE load of 100% for each year) and as 'not full-time' in and after the tenth term (and allocated an FTE load of 50% for each complete subsequent year).
- In 2005–06 and 2006–07, postgraduate students undertaking a full-time course were recorded as 'full-time' for the required terms of their course **plus one extra term**, and thereafter as 'not full-time' (defined as 'full-time writing up/under exam' in 2006–07). Thus in 2005–06, the typical three-year Ph.D. student was recorded as 'full-time' in the first ten terms and from the eleventh term onwards as 'not full-time' ('full-time writing up/under exam' in 2006–07). The allocation of FTE load was 100% for the first ten terms and zero in and after the eleventh term. The annual load was therefore 100% for each of the first three years, 33% for the fourth year (in respect of the tenth term) and zero for all subsequent years.
- From 2007–08, postgraduate students undertaking a full-time course are recorded as 'full-time' for the required terms of their course and as 'full-time writing up/under exam' if they have completed the required terms. Thus the typical three-year Ph.D. student is recorded as 'full-time' in the first nine terms and from the tenth term onwards as 'full-time writing up/under exam'. The allocation of FTE load is 100% for the first nine terms and zero in and after the tenth term. The annual load is therefore 100% for each of the first three years, and zero for all subsequent years.
- In and after 2005–06, the head count of student numbers in Table ALL03 includes the Master of Studies courses; students on those courses are included in the FTE load for all years. However, before 2005–06 the load attributed to students registered on M.St. courses was assigned to cost centre 41 (Institute of Continuing Education). In and after 2005–06, M.St. student load has been reassigned to the appropriate cost centres based upon the relevant M.St. department course owners.

The effects of these changes in definitions are:

- In comparison to 2004–05 totals, the number of postgraduate students defined as 'full-time' in 2005–6 and 2006–07 increased, but the associated FTE load decreased.
- In comparison to 2006–07 totals, both the number and the FTE load of postgraduate students defined as 'full-time' in 2007–08 decreased.

Degrees

- 22 The degrees table lists the numbers of degrees conferred during the previous academic year (2007–08).

This section does not include information about some of the qualifications awarded, for example, the Postgraduate Certificate in Education (PGCE).

Departmental load

- 23 The departmental load table presents the distribution of FTE student load between faculties, departments, and other University institutions. The undergraduate data are derived from examination enrolments (dummy examination enrolments are counted for students who are not taking any examinations). The postgraduate data are based on the department/faculty/institution responsible for delivering the course/supervising the research. Any queries should be directed to the Student Statistics Office (see contact details below).

Overseas tables

- 24 The overseas tables use a number of definitions for 'overseas' student:
- overseas fee eligibility (i.e. students who do not meet the qualifying residency criteria for Home/EU or Island fee eligibility)
 - EU fee eligibility
 - non-British nationality
 - non-British domicile.
- 25 If a student holds more than one nationality, then the nationality given as the primary nationality is reported. This differs from the HESA definition.¹

Table ALL02 only shows the numbers for full-time postgraduates. See Table PG04 for details of part-time postgraduate student numbers.

Table ALL03 shows figures for both full-time and part-time students (with the exception of part-time students studying at the Cambridge Programme for Sustainability Leadership and the Institute for Continuing Education). The sub-table below ALL03 shows the figures for full-time students only.

Table ALL03 includes a head count of students admitted during the Michaelmas term of any given year. See tables PG02a, PG05i and PG06b for numbers of students admitted during the Lent and Easter terms of 2008–09.

² These columns represents the overall assumed number of registrations or load for the academic year 2008–09, taking into account non-completions and registrations after 1 December.

³ Courses are classified as 'long' if students are normally required to attend for 45 weeks or more within the year.

⁴ Allocation of students to price groups. Students are allocated to faculties and departments according to an agreed formula. Faculties and departments are allocated to cost centres in accordance with instructions provided by HEFCE (see Appendix 2). Cost centres are then allocated to the various price groups in accordance with HEFCE rules.

Pre-clinical medical students and pre-clinical veterinary medical students read the Medical and Veterinary Sciences Tripos in years one and two, but read a different tripos in year three. In all other tables they are included under the respective headings 'Pre-clinical Medicine' or 'Pre-clinical Veterinary Medicine' irrespective of the tripos examination for which they were entered.

The following courses are in a state of transition, and Tripos results are shown under two headings: Education Studies to Education; Oriental Studies to Asian and Middle Eastern Studies; and Social and Political Sciences to Politics, Psychology, and Sociology.

Students studying B.A. + M.Eng. and B.A. + M.Sci. and Mus.B. are also included in this table.

'Year of Study' relates to the number of years, excluding any period of intermission, that a student has attended their current course. Thus a student who has kept one to three terms will be in Year 1, and a student who has kept four to six terms will be in Year 2.

The following courses are in a state of transition, and Tripos results are shown under two headings: Education Studies to Education; Oriental Studies to Asian and Middle Eastern Studies; and Social and Political Sciences to Politics, Psychology, and Sociology.

Mature students are those who were 21 years of age or more when they were admitted to their course.

B.A. includes students studying B.A. + M.Eng., B.A. + M.Sci. and B.A. + C.A.S.M. and Mus.B.

The following courses are in a state of transition, and Tripos results are shown under two headings: Education Studies to Education; Oriental Studies to Asian and Middle Eastern Studies; and Social and Political Sciences to Politics, Psychology, and Sociology.

Cambridge Programme for Sustainability Leadership students are included in this table because they are admitted in March/April of each year. In 2007–08 they were included in table PG02. One female M.Phil. Engineering student was retrospectively recorded as under early examination, but as at 1 December the data showed her as full-time. She appears as full-time in this table.

(Table PG04 shows figures for postgraduates with a part-time mode of study)

Cambridge Programme for Sustainability Leadership students are included in this table because they are admitted in March/April of each year. In 2007-08 they were included in table PG05. One home M.Phil. student was retrospectively recorded as under early examination, but as at 1 December the data showed her as full-time. She appears as full-time in this table.

Postgraduates with a full-time mode of study admitted to their current course in October 2008

Part-time students studying at the Cambridge Programme for Sustainability Leadership, and Faculty of Education INSET courses (In-Service Education of Teachers), are excluded.
Up to and including 2004–05, the 'White' category was broken down into several categories. They are now under one category due to a change in the HESA classification.

NOTES

- 1) Students following part-time courses at the Cambridge Programme for Sustainability Leadership are excluded.
- 2) Visiting ERASMUS postgraduate students and other visiting postgraduate students (NTBRs) are excluded.
- 3) Modern Languages and Oriental Studies undergraduate students working/studying year abroad have load of 0.5 FTE.
- 4) Law Double Maitrise students studying at ParisII have zero load.
- 5) Graduate Medical Course – the total load for these students is placed under 'Graduate Medical Course' (i.e. not under individual departments).
- 6) ICE load is taken from the HESES 2008 Return – all placed under Home, EU and Islands here, including load for overseas ICE students.

*See Appendix 4 for a definition of tuition fee bands.

** From 1980 to 1990, 'Other' refers to the pre-1980 rate of overseas fees. Thereafter it refers to any fee not otherwise specified as 'Arts', 'Science' or 'Clinical' (for example, the M.B.A.). Incoming and outgoing ERASMUS students and Incoming MIT students are excluded because they do not pay fees.
